## Quality Assurance

All our materials and products go through a rigorous inspection process. From raw material collection to packaging, our hair is tested again and again. Not only is the hair quality inspected but we also follow strict guidelines to ensure your specifications are met exactly.

## Research and Development

We are very proud to announce that as of 2013 we have a private research partnership with the **Chinese Academy of Sciences (CAS)** in Beijing.

Together we are currently researching better techniques for the chemical processes involved in cleaning, bleaching and dying hair. That data that we have and will continue to collect will allow us to fine tune our chemical processes resulting in a product that is more durable and natural than the competitions.

## About Our Hair

### Remy Hair

All our Remy hair products are made with 100% Remy Hair, the cuticles are still attached and the strands all run in the same from head to tip. Remy hair will last for at least a year with proper care and maintenance. This hair will not tangle due to all the strands running in the same direction. Remy hair will always look and feel natural.

### Virgin Hair

Our Virgin hair is 100% organic Remy hair with all the cuticles intact and has not been chemically treated in anyway.

### 100% Human Hair

100% Human Hair is the most affordable material for low to medium prices extensions. Thanks to advancements in production procedures our human hair does will not tangle and is indistinguishable to the naked eye.

### Hair Origin

Having been in this line for more than 20 years, we're well connected with only the most reliable hair sourcing agents domestically and abroad (Our factory is conveniently located in the raw hair concentration and distribution center in China which make it very easy for us to get large quantity of high quality hair)

To make sure our customers get the best virgin remy hair, we also use multiple sources from around the world, such as South East Asia, India, Russia and other countries.

**Please check Page 20 Ethicality Statement for details.**

## OEM Packaging

We provide an excellent OEM/ODM service, handling every aspect of packaging along with you. Many of our clients like to begin a new line with our hair extensions, in this case we have helped them redesign their packaging.

We offer full range of packaging options:

### Hair Extensions Plastic Enclosures (bag)

### Hair Extensions Boxes

### Bags Hangers Package

# Hand Tied & Machine Wefts

## Clip-in Hair Extensions

Clip-In extensions are the simplest method for adding hair length, volume or colour to ones hair. Clip-In extensions use pressure sensitive clips. This form of extension does not require glue or heat. Clip-In extensions are the most widely available and popular extensions.

All Specifications can be customized to your requirements

## Beautymax Hair Statement

Having been in this line for more than 20 years, we are,well connected with only the most reliable hair sourcing agents domestically and abroad (Our factory is conveniently located in the raw hair concentration and distribution center in China which make it very easy for us to get large quantity of high quality hair) To make sure our customers get the best virgin remy hair, we also use multiple sources from around the world, such as South East Asia, India, Russia and other countries.

Weare,committed to ensuring that all of the hair we use is the best quality 100% remy human hair and we take every measure to ensure the sourcing, purchasing and processing of the hair are ethical.

The following includes how we collect hair from different origins:

### Indian Hair

We get our Indian hair from our sourcing agents in India where people have a very common practice of offering their hair (in certain temples) to make their wish come true.

### Chinese Hair

Our Chinese hair is collected by our sourcing agents mainly from the rural areas in South China (Yunnan, Sichuan and Hunan provinces) where women's hair is very thin, soft, smooth and strong; also, most of the hair has not been chemically treated in any way.

### South East Asian Hair (Vietnam Malaysia), and Russian Hair.

We receive hair from these countries through our sourcing agents who import the hair directly from the source.

### Quality assurance process

Once the hair is collected and completes the long journey to our factory, our strict quality assurance process continues with a complete washing and inspection to identify any imperfections.
