CREACTIVE SOFT CREASE

Weton's clear plastic boxes are manufactured using the most advanced soft crease technology providing the perfect color processing and precision dimensions. This enables easier forming and superior shaping resulting in a higher quality product. Our fully automated systems allow for quicker processing of large quantity orders matching your tight lead times and high quality specifications. Our soft crease technology has been widely used for PET and PVC. Clear plastic boxes with soft crease technology and auto-bottom design have superior strength, precision shape characteristic and reduced labor times.
