# 1.COMPANY INSTRCUTION

1. Company history: The company was established in 2005. Located in the second human hair industrial park in Juancheng County, Shandong Province, China. From 2000 to 2004, the company mainly supplied raw materials to Korean customers. From raw materials to finished products on 2008. Products have also begun to diversify and more comprehensively adapt to market needs. After 15 years of development, the factory has now become a new modern factory covering all kinds of products .

2. Company capacity: The company occupies an area of more than 50,000 square meters and currently has 375 employees!

The annual output value of 2018 is 300 million yuan! Among them, the monthly export volume of natural color hair weave is more than 20,000pcs, more than 30,000 packages of color hair extensions, and more than 2,000 wigs!

In 2019, annual sales of 350 million yuan! The monthly export volume of natural color hair weave is more than 25,000 pieces, the color hair extension is 40,000 packages, and the wigs is more than 2,000 a month!

With the increase in orders, the company is expanding its scale, staff, and adding new production lines.

## 2. COMPANY PRODUCTION DEPARTMENT INTRODUCTION

### 1. Raw material warehouse and finished product warehouse

The raw material warehouse is divided into the Raw hair material warehouse and the Dyed hair warehouse.

The hair raw material warehouse is full of natural colors, without dyeing raw materials. According to customer requirements, different raw materials are selected for dyeing. We have 3 raw material warehouses now. If there is a shortage of raw materials. The stock of raw materials in 3 warehouses can be guaranteed for 3 months.

In addition, Raw material suppliers provide us the raw hair materials every day.

## 2. COMPANY PRODUCTION DEPARTMENT INTRODUCTION

### 2. Dyed hair material warehouse

Inside the dyed hair material warehouse are all dyed color materials.

Some old customers often place orders, and we will dye more raw materials.

For example, the customer orders 100kg #60 color. We will dye 200kg #60. One is to save costs. Second, it can save a lot of production time, and customers can receive the goods faster

## 2. COMPANY PRODUCTION DEPARTMENT INTRODUCTION

### 3.Finished products warehouse

The finished product warehouse is based on the more conventional products on the market. Customers often buy and sell better products on our B2C platform. Do some finished products inventory.

The inventory requires no less than 20,000 natural color hair weave, colored clip in hair , Tape in hair no less than 50,000 packs, and no less than 10,000 wigs.

In this way, some customers are more anxious to request the goods, and we can send them out immediately.

## 2. COMPANY PRODUCTION DEPARTMENT INTRODUCTION

### 4. Pulling Hair

Pulling hair is to remove short hair according to the customer's request. Control the ratio.

After the worker finishes the pulling hair. There are special quality inspectors who will check the short hair and the ratio.

If ok, it will enter the next process. If it is not ok, the workers will have to pull again.

## 2. COMPANY PRODUCTION DEPARTMENT INTRODUCTION

### 5. Dye and Final treatment

Bleaching and dyeing: After the customer places an order, the raw material warehouse will select suitable raw materials, and then bleach and dye. You can follow the factory color ring or the customer's color ring.

After bleaching and dyeing, the worker washes out the not fixed color on the hair and then performs final treatment.

Final treatment is to deal with the hand feeling, make the hair smooth, and customers will not get dry, frizzy or tangle

After the final treatment, enter the drying room and dry. Go to the next process.

## 2. COMPANY PRODUCTION DEPARTMENT INTRODUCTION

### 6. Make glue

After drying the raw materials, the quality inspector checks the color and the range is completely correct.

Then go to the next step and make the finished product.

The picture on the left is tape in.

The picture on the right is doing prebond.

## 2. COMPANY PRODUCTION DEPARTMENT INTRODUCTION
