Sheencos Chameleon Effect Pigment as a new advanced Optically Variable Pigment based on special chips substrates and coated by multilayer metal oxides coatings according to optical property.

Each piece of pigments reflects constantly changing colors under the condition of different viewing angles and light ray incident angles, showing a flop of a special effect, helping products to add dynamic and stunning colors.

鑫铂变色龙系列效果颜料根据光学性能原理生产，基于各种类型的特殊基材包覆多层金属氧化物，在观察角度和光线入射不同的情况下，每片颜料闪烁出缤纷变化的色彩，增加活力和新鲜色彩，产生强烈的视觉冲击。
