Intelligent Heat Control Hairdryer

Core Technology

dreame

- Established in Shanghai, Dreame Technology is an innovative technology company with the geek gene deep in the blood. It derives from “Sky Workshop” founded in Tsinghua University by Yu Hao, which later officially join MI ecological chain at the end of 2017.
- Dreame Technology boasts a series of key innovational technologies in high-speed digital motor, multi-cone cyclone separation technology, etc. Many explorations have been made on the world's leading technology and innovation. The goal is to bring quality life to every single user in the world, and with powerful technology, we can change the world together.

Australia, Japan, South Korea, German, Spain, Singapore...

We provide intelligent home appliances for consumers in over 83 countries

Dreame Cordless vacuum Cleaner

Xiaomi Crowdfunding over USD 2,100,000.00

Sould out only within 7 days

The fastest sold out record
in the catagory of Xiaomi stick vacuum cleaner

Hair Artist Intelligent Heat Control Hairdryer

quick drying / no extreme heat
negative ion / 360° magnetic nozzles

Powerful airflow

110,000rpm high-speed motor

Powerful airflow is generated by the world-class motor

Airflow Speed
up to 58-60m/s

Powerful Motor
spinning at 110,000RPM

Heat Control
at 50times/second

Negative Ion
deeply cares your hair

Ergonomic Handle
balances handheld experience

Magnetic Nozzles
provide 360° rotation

Your hair is the most beautiful treasure

Drying it without extreme heat

The experimental results showed that, overheating cause the hair scale open, which is the main reason to make your hair dry, split, and lose shining.

Dreame Hair Artist intelligent heat control hairdryer, powered by the high-speed motor dries hair without extreme heat, can close the hair scale quickly to lock moisture and nutrition and rejuvenate your hair with nature shining.

Doctor. Wang, Hair Artist, China Central Academy of Fine Arts

58-60m/sec high-speed airflow ensures quick and damage-free hair drying

Dreame Hair Artist used high-speed airflow vent in design, which helps to decrease hair friction and prevent hair loss effectively.

Opened hair scalp increase friction

Quick drying without extreme heat can keep the hair scalp closed

By using hydrokinetic design, we make the strong airflow cross at the point of 15cm in front of the air vent which ensures the best using experience.

Technology + Fashion

Dreame Hair Artist Hairdryer has an elegant, streamlined appearance and 3 working mode, the latter satisfying various needs in hair styling at home and the saloon.

“We should care our hair by Dreame Intelligent Heat Control Hairdryer.”

Hair Styling

Smooth Caring

Care hair without extreme heat

50times/sec heat monitoring

The built-in microprocessor and sensor continuously monitor the heat under all modes, even if the inlet and outlet were blocked, it also protects your hair from over-heat damage.

Negative ion makes hair shiny and smooth

Generates 10,000,000pcs/cm³ negative ion to care your hair

*The concentration of negative ion is over 10 million pcs/cm³ at the 10cm point in front of the air outlet nozzle.

Ergonomic handhold

with the whole weight $\leq 585\text{g}$

Instead of following the old structural arrangement of traditional hairdryers, we put the motor in the handle to let the whole machine match ergonomic balance and relax your arm when using it.

The concave design in the head makes the whole weight lighter and conveys a sense of minimalism and tenderness.

Improve all the details
