DONGGUAN DEDICATOR COMMODITY CO.,LTD

**JUST ONLY FOAMING NET IN 9 YEARS  
CUSTOMERS ALL AROUND THE WORLD**

ISO140001:2015 certificate

SGS inspection report

ISO9001:2008 certificate

EN 13432 Standard 100% Compostable Certification

## INTRODUCTION

We start break new ground in 2008, and found in 2009 formally, more than ten years we only produce foaming net, develop almost 150 styles foaming net, own multiple patent related with foaming net, supply for hundreds of brand(OEM)like as Shiseido, DHC, OSM, PONDS, CHANDO and so on.

We Developed the new 100% fully degradable foaming net series successfully in 2019, and obtained the certificates related with 100% fully degradable from the European TUV certification authority issued(TUV OK COMPOST INDUSTRIAL & En13432).

We are the biggest and most professional foaming net manufacturer in China at present, located in Dongguan city, we passed the ISO9001:2008 Quality Management System&ISO14000 global environment manage system qualification, the nets pass the SGS inspection and CE certificates approved by EU, our production capacity could reach more 20 million, and growing and growing. Whatever it's on the quality, production capacity or cooperate with you on the service, believing that we are your best choice and reliable green leaves!

# The application of the foaming net will be a revolution of details. After all

The Shiseido,OSM,DHC,CHANEL,Amore,Mentholatum,Ponds and so on of cosmetics were used our foaming net,which producing according the International standard,as the gift with their face wash products, the apply of foaming net have already get the full proof.

## What's the foaming net ?

Foaming net is a kind of daily necessities of personal care for wash hand, face, shower and wash hair. It can help to expert the effect of daily chemical and face-cleaning & showerproducts(including cleanser, face-cleaning soap, bath gel, cream cleaner, face cleaning soap, transparent soap, handmade soap, washing mud, beauty soap, face cleaning fat& powder and so on)by producing abundant exquisite cotton-like foams , use the cotton-like foams to take shower, easy clean and take care for skin, there are different funtions use on the different kinds products.

## The principle of the foaming net

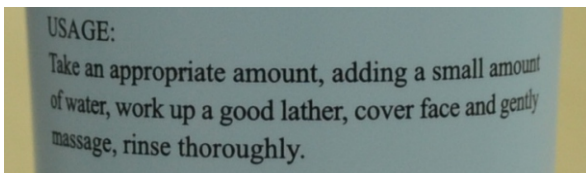

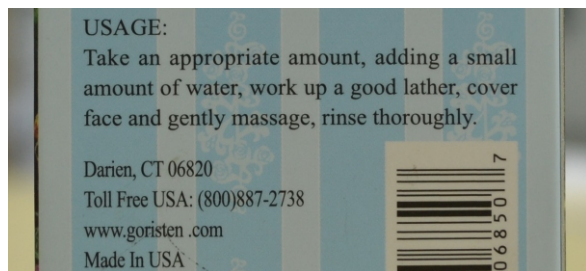

Most daily chemcial & face-clean & Shower gel products mainly depend on the foams to clean, in fact, it can't rub foams by hands, everyone knows this fact, so the basic principle that the slender hole of foaming net between the soap, facial cleanser, body lotions, shampoo and the water through rubbing with the hands repeatedly, then the foams come out, and it's related to the soap, facial cleanser, body lotions, shampoo's formula, and the foaming net need to give attention to hang dry's tenet, avoid breed bacteria.

## Application of foaming net

In the daily chemical and cosmetics industry's competition is so fierce at present, everyone is looking for a practical and effective method to keep customer, among in, the most important that it do analysis deeply to the cosmetic and cleansing products , not only to make their cosmetic and cleansing products' clean effect better than other brands, but also let the customer see& feel, at the moment, the foaming can be perfect supporting role. Not only increase the daily chemicals and cleansing products' new strengths, but also let customers see and feel the effect , in the future competition, the daily, cosmetics brand pay more attention to the details , occupy more advantages.

The application of the foaming net will be a revolution of details. After all, beautiful flowers always need the foil of green leaves. Now, you know why these big cosmetics and daily companies use foaming nets as gifts!

The following images are shot from the instructions of products made by different manufacturers at the rear of product package.

Pay attention to the "foam" in the image

## Knowledge 100% fully degradable foaming net

### 1, What's 100% fully degradable foaming net?

It is made of 100% fully degraded plastic as the main material and pure cotton rope belt as the accessories. This 100% fully degraded plastic is mainly comprised of PBAT and PLA. After making the foam net, it can meet all kinds of requirements for the using foam net, foaming net that can be degraded into environmentally harmless substances (water and carbon dioxide) under natural environmental conditions after one year of storage, while the performance remains unchanged during the one-year storage period.

### 2, 100% fully degraded foaming mesh consists of the following three components

**PLA** is an English acronym of polylactic acid, is a new kind of biomaterial and renewable biodegradable material. It is made from starch materials from renewable plant resources such as corn cassava and so on. Starch raw materials are saccharified to produce glucose, then high purity lactic acid is produced by fermentation of glucose and certain bacteria, and then a certain molecular weight of polylactic acid is synthesized by chemical synthesis. It has good biodegradability, and can be completely degraded by microorganisms in the nature under special conditions, resulting in the formation of carbon dioxide and water, and does not pollute the environment, which is beneficial to the protection of the environment. It's very beneficial. It's a recognized environmentally friendly material.

**PBAT** is a thermoplastic biodegradable plastic. It is a copolymer of butylene adipate and butylene terephthalate, both the characteristic of PBA and PBT, and has good ductility and elongation at break, as well as good heat resistance and impact resistance. In addition, it has excellent biodegradability, which is one of the most active biodegradable materials in the field of biodegradable plastics.

**Pure cotton rope** is cotton as raw material, through loom, warp and weft yarn vertical and horizontal floating and intertwined rope. Cotton itself is a creature, that it discarded

## FOAMING NET FOR SOAP SPECIALTY

Function:

1. Make the soaps to rub rich foam quickly
2. Prevent the soap slide
3. Using the soap to the end reduce waste
4. Use like as bath brush, wash more cleanly

## USAGE

Collocation use with the soaps (normal scented soap soap, kinds of handmade soap and so on)
