Step 1: Trim

For desired eyebrow length just trim them! Use the small head and add the comb attachment. Place the device over your eyebrow and move it against the direction of hair growth.

Step 2: Shape

For perfect eyebrow contouring, remove the comb and use the high precision head. Touch skin lightly and push it across the eyebrow.

Step 3: Finish

You may choose to fill in your eyebrow by applying a small hatching pattern using an eyebrow pencil for the perfect finish.

No risk of cuts!

It's two rows of rounded blades drive hair to the cutting blades, which have no direct contact with the skin, hence no fear of cuts
