innovation

### EMOTION® LINE

EMotion® results come from an innovative way of making cosmetic, with a natural background, but without any interference with the food supply chain.

By this way, it is possible to create ingredients without producing waste, aiming at an impact zero on the Environment, instead of just a reduction of energy usage or pollutants emission.

**EMotion® Esters:** biodegradable esters. Ethical alternative to silicones. Proved performances in pigments and UV filters dispersion as well as formula texture improvement.

### OLIFEEL® LINE

High-quality Olive fruits, coming from a transparent and traceable Italian supply chain. By isolating purified fractions, each element of the line results in such purity.

The process of Olive fractions purification happens once they have already exited the agro-food production chain, so they do not subtract food or land to people and minimize waste and by-products.

**Olifeel® SKin:** ideal to modulate and improve stability and emulsification, as well as to carry active and functional ingredients into the skin.

**Olifeel® Pearls:** able to replace all synthetic and semi-synthetic gelling agents for lipophilic phases.
