Tixel-- Powered by TMA No irradiation, just Pure Natural heat

Item NO.: MCM332

Tixel is similar in effectiveness to fractional CO₂ laser treatment It's a 3 in 1 cost effective fractional ablative, non-ablative and open channel device.

Revolutionizing fractional Skin Rejuvenation

The Tixel treatment typically results in improvement in skin texture and complexion , younger look, wrinkle reduction, better definition of eyelids and high patient satisfaction.

Item NO.: MCM333

Tixel-- Powered by TMA 1. Treat all skin types, quickly and effectively

2. Maximum safety, minimal side effects
3. Compact solution, operational efficacy
4. Easy to use and delegable

TMA is a teachnology. It uniquely combines motion and heat with the forward movement of a medical-grade titanium tip. This proprietary non-laser fractional technology transfers thermal energy to skin very quickly and safely: energy is emitted through a matrix of tiny pyramid-shaped pins made of biocompatible materials covering a treatment area of 1cm². The pins are heated to a temperature of 400°C and are self-sterilized.

1064nm 532nm 785nm Cynosure Picosecond Laser Beauty Machine

Picoway aesthetic lasers have evolved to meet consumer demands with bold yet gentle treatment

1 picosecond = 10⁻¹² second

Advantages

***3 wavelengths**

532nm,785nm & 1064nm picosecond laser

***High Peak Power**

Delivers energy over a broad range of spot sizes

***Shortest Pulses**

Allows effective treatment with minimal risk of side effects

time to crush melanin inside skin

PicoWay is completely safe because it generates less heat compared to traditional lasers, leaving the skin intact. Thus, it minimizes the risk of side effects and offers an effective treatment with little to no recovery time. PicoWay can achieve greater results in fewer treatments than any laser technology on the market, with more comfort and ease. PicoWay can penetrate the skin with its **picosecond pulse technology** to better treat pigmented lesions

Item NO.: MCM258

10600nm Multifunctional Fractional CO2 Laser Beauty Machine

CO2 fractional CO2 laser uses fractioned CO2 technology to reduce the look of fine lines, wrinkles, dark spots, and other imperfections on the face. CO2 is an invasive ablative, fractional CO2 laser that emits microscopic columns into the surface, middle and deep dermal layers of skin. With the CO2 laser, it can treat both deep and superficial skin layers simultaneously while controlling the depth of ablation, pattern, and density.

The CO2 procedure treats a multitude of skin imperfections such as scars, skin texture, dark spots, and skin growths, and facial lines and wrinkles. This treatment is unique because it allows the doctor to precisely target areas of the skin that need correction.
